

IMIA NI SIG

Celebrating International Day of the Nurse, May 12, 2020, IMIA extends a special thank you, appreciation and gratitude to all IMIA NI SIG members

IMIA NI SIG and EFMI's Nursing Work Group's support Our Nurses Campaign toward Covid 19

Introductory Message from Dr. Ann Kristin Rotegård, IMIA NI Vice Chair Communications and associated professor Inge Cort Madsen, EFMI NI Chair

The nursing informatics community from the International Medical Informatics Association's Nursing Informatics Special Interest Group (IMIA NI SIG) and the European Federation of Medical Informatics Nursing Informatics (EFMI NI) have collaborated to offer resources to support nurses. Our goal is to provide different kinds of material such as videos, article, powerpoints, tip sheets etc. about how to use digital tools in clinical practice and education. Our resources may help you to better understand how nursing informatics will facilitate clinical practice, nursing education and research. We have called upon our international nursing informatics community to share their resources with you. This material are open access and available for you to use and share.

We are starting in three areas:

Daily Practice

Education

Research & Development

We think some of these tools may help you as we all struggle with the COVID-19 pandemic. We will be continuing to update with more resources.

If you are interested in contributing please contact the IMIA NI Chair, Dr. Diane Skiba at imiani@imia-medinfo.org
