

MIMTT2022: 3rd Europe-China Health IT Summit on Medical Innovation, Medical Informatics, Medical Imaging and Medical Technology Transfer

Artificial Intelligence as a driver for Innovation: healthcare before Healthcare

Prague, The Czech Republic, August 23-27, 2022

Call for Papers

Following the successful cooperation of CMIA and EFMI on the 1stEU-China Health Summit on 25th of August 2019 in Lyon, France with MedInfo2019 (<https://efmi.org/eu-china-health-summit/>) and the 2nd EU-China Health Summit on Medical Innovation and Technology Transfer hosted by CPDE, CMIA, CTA, and CHIMS in China on October 21-25, 2020 as an online conference, we are delighted to announce the 3rd Europe China Health IT summit for August 23-27, 2022. The summit will cover topics in Medical Imaging, Health Informatics, Medical Innovation and technology knowledge transfer, and artificial intelligence, with the aim to advance cooperation and promote the exchange of medical knowledge under the theme of AI as a driver for Innovation: Healthcare before and healthcare. This is to indicate the raising importance of health data, prevention, and public health. The conference will be hybrid and will be hosted in the Czech Technical University in Prague.

The summit invites contributions regular papers (5 pages), posters (1 page), and workshops (2 pages) to the summit addressing specific topics in the MI3 areas, as follows:

- Medical Imaging physics and processing
- Findable Accessible Interoperable Reusable (FAIR) Health Data Sets
- Health technology standards and interoperability
- Robotics of health and social care
- Citizen engagement with digital health technology
- Mobile health assessment and contact tracing apps
- Digital health for nursing and rehabilitation
- Health technology in Living environments and the Internet of Things
- **Medical Innovation, Intellectual Property, and Patent Management**
- Digital health technology for emergency care
- AI in Health and Wellness Technology
- AI in the hospital of the future
- Privacy, ethics, and Cyber-security in the AI age.
