Call for Papers & Participation to pHealth 2022

Oslo, Norway, 8-10 November 2022

phealth2022.online

Dear Colleague,

We thank you very much for your support in one or more of our pHealth conferences as well as related events of the European Federation of Medical Informatics (EFMI). We would like to direct your attention to the coming pHealth 2022 Conference, happening on 8-10 November 2022 in Oslo, Norway, organized by the eHealth and Welfare Security group at the Department of Information Security and Communication Technology at the Norwegian University of Science and Technology.

The 2022 edition of pHealth will emphasize the interrelated aspects of pHealth, i.e. advanced digital health ecosystems. In that context, mobile technologies, micro-nano-bio smart systems, bio-data management and analytics, machine learning, artificial intelligence and robotics for personalized health, the Health Internet of Things (HIoT), systems medicine, public health and virtual care. It also addresses new potential risks for security and privacy as well as safety chances and challenges, trustworthiness of partners and processes, the motivation and empowerment of patients in care processes, and health systems challenges in developing countries. The multilateral benefits of pHealth technologies for all stakeholder communities give enormous potential, not only for medical quality improvement and industrial competitiveness, but also for managing health care costs and, last but not least, improving patient experiences.

The pHealth 2022 committees strive towards the possibility of including workshops and related pre-conference events for graduates and PhD students in the field. The event is hosted by the eHealth and Welfare Security group at the Department of Information Security and Communication Technology at the Norwegian University of Science and Technology, together with the Southern and Eastern Norway Regional Health Authority.

Traditionally, pHealth 2022 is supported by the European Federation for Medical Informatics (EFMI) and especially its Working Groups Personal Portable Devices (PPD), Security, Safety and Ethics (SSE), and Translational Health Informatics (THI), but also by the Standards Developing Organizations ISO/TC215, CEN/TC251, and HL7 International.

All papers must be formatted in accordance with the IOS Press template instructions and have to be submitted through the conference online system at phealth2022.online. All submitted papers will be subject to a peer-review process by three independent reviewers. Accepted full papers will be included in the pHealth 2022 Proceedings published in Open Access in the IOS Press Series "Studies in Health Technology and Informatics". The series is indexed at Elsevier's EMCare, Elsevier's SciVerse Scopus, Google Scholar / Google Books, MEDLINE, PubMed, Thomson Reuters' Book Citation Index, and Thomson Reuters' Conference Proceedings Citation Index. More details can be found on the pHealth 2022 Website phealth2022.online.

Key Dates:

Paper submission deadline: 15 July 2022

Notification of acceptance of, and comments on, submissions: 12 August 2022

Re-submission of revised accepted papers: 21 August 2022

Notification of acceptance for, and comments on, revised papers: 26 August 2022

Early-bird author registration: 5 September 2022

Re-submission of camera-ready papers: 9 September 2022
